

We are an engineering company, based for 33 years near Saint Etienne, in France.

In 2012, OMG created its own berlingotière which is called « Jassaranis »

OMG has been working for the food industry for many years, we have vast experience in this field.

LA BERLINGOTIERE

Made in our workshop in Roche la Molière in the Loire county, La Berlingotière generates the cute shape of the Carpentras berlingots which weigh around 4 grams.

We ship all over the world to confectioners, pastry chefs and beekeepers working with honey products.

All our berlingotières are made out of stainless steel which is food compatible. Overall dimensions (manual machine) : 400 x 230 x 200 mm.

3 MODELS ACCORDING TO YOUR NEEDS

THE PRO VERSION : made out of aluminium and stainless steel, it can produce up to 30 Kg of candy per day and is suitable for artisanal production.

THE PRO MOTORISED VERSION : similar to the pro manual version with an extra motor for a 50 Kg per hour production.

THE ECO VERSION : Composed of plastic gears, aluminium and stainless steel parts, it produces 1 Kg of sweets per half-day.
